Subject: **New Neapco Performance Series High-Speed Constant Velocity (HSCV) Aluminum Driveshaft Kits for Ford Mustang® Applications**

To: **All Neapco Drivelines Aftermarket Group Customers**

Neapco is pleased to announce our new Neapco Performance Series Aluminum Un-Welded High-Speed Constant Velocity (HSCV) Driveshaft Kits for Ford Mustang GT, Shelby GT350, and EcoBoost applications. These new Neapco kits include all the components and hardware to build a complete driveshaft. These kits also eliminate any guesswork when sourcing individual components, making your shop much more efficient with time and productivity.

Neapco Performance Series aluminum driveshaft kits for Ford Mustang applications are designed, engineered, and manufactured with the highest-quality materials, to provide optimal features, advantages, and benefits that meet the application-specific demands of the vehicle:

- 3.5" X .125" X 54" 6061-T6 aluminum tube.
 - **Driveshaft tube length must be sized to vehicle application prior to final assembly.**
- 6061-T6 1350 series weld yoke for .125" wall tubing.
- Direct bolt up 1350 series steel transmission flange yoke.
- High-Speed Constant Velocity Joint rear differential connection:
 - 32.5mm of plunge at 0°. **(On select part numbers)**
 - Performance stub shaft made from heat treated 4140 steel alloy.
 - Reduced NVH (noise, vibration, and harshness).
- Neapco Performance 6061-T6 1350 Series yoke-shaft kit with nylon coated spline and Neapco Performance Series PTFE grease to reduce plunge force during load. **(On select part numbers w/ fixed HSCV joint)**
- Neapco Performance Series 1350 u-joints - proven to outperform the leading competitor.
- Mounting hardware included w/thread locker pre-applied.
- Reduction in overall weight and rotating mass.
 - Up to 18lbs lighter than a two-piece OE steel driveshaft.
 - Improved acceleration and throttle response.
- Designed to handle increased torque load.
- Direct bolt up to OE transmission and rear differential flanges. No adapters required.
