Subject: Neapco To Transition Carbon Fiber Driveline Offering to Amalga

To: All Neapco Drivelines Aftermarket Group Customers

Neapco will be exiting the carbon fiber driveshaft market. After extensive consideration internally, and with our carbon fiber tubing partner (Amalga Composites), we determined it would be most beneficial to our current customers, from a competitive pricing perspective, to transition the carbon fiber driveshaft business to Amalga. We have been working very closely with Amalga, and they have agreed to continue to serve all your carbon fiber needs, including carbon fiber tubes, Neapco bond ends, and associated products such as adhesives.

Our current inventory of Neapco TrakHook® carbon fiber tubing, bondable ends, adhesives, and other associated products will continue to be available from Neapco until our current inventories are depleted.

Please reach out to your Neapco Sales Representative to discuss opportunities to buy our current inventories at a discounted rate. This will help expedite the transition to Amalga.

As part of the transition, Neapco has provided Amalga with a list of all our active Carbon Fiber customers so they can reach out to you immediately. However, you are welcome to reach out to them as well, by emailing customerservice@amalgacomposites.com or calling (414) 453-9555, and asking to speak to their aftermarket sales group.

This transition to Amalga will also allow Neapco to stay focused on expanding our, already industry-leading, Steel and Aluminum portfolio, including the introduction of new tube lengths, and our Driveshaft In a Box (DIB) kits that make our customers more efficient and effective in their business.

As always, we do appreciate your business, and we apologize for the inconvenience this may cause. We will work with you to lessen the impact as best we can.

Regards,

Tim Goode
Vice President Sales and Marketing
