Subject: **Neapco – New Tube Straightener - State of the Art Technology**

To: **All Neapco Drivelines Aftermarket Group Customers**

Neapco is pleased to announce our latest investment in state-of-the-art technology. Neapco has long been known for providing the best driveshaft tubing in the market and has taken another giant step forward to enhance that reputation of quality. Our recent purchase of a new, state-of-the-art Galdabini Tube Straightener.

This highly sophisticated machine includes precision lasers that analyze the entire tube, identifies any section needing adjustment, corrects those areas until a full green bar pattern is achieved. The Galdabini is a premier tube straightener, globally, and provides a level of advanced technology and precision that is unmatched in our market, thus continuing to place Neapco tubing at the top.

Capabilities include:

- Tube diameters from 1" to 6"
- Tube lengths between 30" to 120"
- Tube wall thickness from 3 gauge (.239") to 16 gauge (.065")
- Tube straightness within 5 thousandths of an inch

The Galdabini straightener provides maximum reliability and flexibility and is online and in production now. Providing you, our valued customers, with the straightest possible tubing, will bring driveshaft production efficiencies in your business. We understand time is money!

Trust Neapco to provide you the best tubing as well as all other high-quality driveline components. Watch for more exciting news in the future!
